SECTION B

51. Read the passage below carefully and answer the questions that follow in full sentences.

There are a number of hurdles in the education system. Some of them are common at all levels of education whereas others apply to particular levels. Some of these hurdles can be paying school fees as required by the institution. The amount of school fees is determined by the governing body of that institution.

In addition to the above, one has to put on uniform designed in a certain way and some schools have different uniforms for particular days.

Secondly, the most challenging part is the issue of examinations. If there was a chance to decide, the majority would not accept this matter. There are always a lot of reasons given for the majority who hate examinations. They say that examinations don't cater for skills and talents like public speaking, football, netball, music, dance and drama.

However, for one to be promoted to the next level. One must be subjected to an examination because it is only the yardstick in the education system. My opinion is that students at all levels should always make thorough preparations in order to avoid failure in any kind of examination.
