SECTION A: 40 MARKS

Answer all questions in this section

Question 1 to 20 carry two marks

<p>1. Work out: $39 \div 3$</p>	<p>6. Find the sum of the next number in the sequence below. 1, 3, 6, 11, 18 _____, _____</p>
<p>2. Write 90049 in words</p> <p>.....</p> <p>.....</p> <p>.....</p>	<p>7. Using a protractor, measure angle PQR below.</p> 
<p>3. In the venn diagram below, find $n(S)$ complement.</p> 	<p>8 The cost of 2 litres of petrol is Shs. 8,000/=. How much petrol will one buy with shs. 14,000/=.</p>
<p>4. Work out: $-6 - 4$</p>	<p>9. Round off 99.64 to the nearest whole number.</p>
<p>5. Solve the inequality: $5 - 3q < 17$</p> <div data-bbox="715 1780 821 1872" style="border: 1px solid black; width: 67px; height: 41px; margin-left: auto;"></div>	<p>10. Give that $m = n = 4$ and $g = -2$, evaluate $mn - g$</p> <div data-bbox="1396 1780 1503 1872" style="border: 1px solid black; width: 67px; height: 41px; margin-left: auto;"></div>

<p>11. The Lowest Common Multiple (LCM) of two numbers is 36 and their Greatest Common Factor (GCF) is 6. If the first number is 12, find the second number.</p>	<p>15. Find the value of K in the figure below in degrees.</p> 
<p>12. Henry borrowed Shs. 300,000/= from a money lender. He paid a simple interest rate of 8% per month for 3 months. Calculate the simple interest he paid after the 3 months</p>	<p>16. Suzan bought 3.5kgs of maize flour. She packed all the flour in small sackets of 500gs each. How many sackets did she get from all the flour?</p>
<p>13. A box of chalk weights 11.5kgs when the box of chalk is a half full of chalk, it weights 6.5kgs. calculate the weight of chalk only.</p>	<p>17. Workout: $(86 \div 4) - (6 \div 4)$ using distributive property only.</p>
<p>14. The circumference of a semicircle is 22dm. Find its area.</p>	<p>18. A bus moving from Kampala to Kisoro took 7 hours and 25 minutes. If the bus reached Kisoro at 2:10pm. At what time did the bus leave Kampala?</p> <p>19. Yesterday was Wednesday, what day of the week will it be after 17 days.</p>

20. A cheetah ran a distance of 60metres in only 3 seconds. Calculate the speed it was using in km/hr

SECTION B: 60MARKS

Answer **all** questions in this section

Marks for each of the part of the question are indicated in the brackets.

21. a) Work out:

$$\begin{array}{r} 4 \quad 2 \quad 3 \text{ five} \\ - \quad 1 \quad 3 \quad 4 \text{ five} \\ \hline \end{array}$$

b) Express CXCIV as Hindu Arabic numerals (2marks)

22. In a class of 50 members, 25 like dancing (D), q like singing(S) only, 10 like both activities while 5 do not like any of the two activities.

(a) Complete the venn diagram below. (2 marks)

b) Find the number of members who like singing (3 marks)

23. Stellah went for shopping and bought the following items.

- 3kgs of beans at shs. 3800 @kigs
- 1kg of salt at shs. 1500 per kg
- 500g of meat at shs. 15,000 per kg
- 8 apples at shs. 4800.

a) How much did she spend altogether (4 marks)

b) If she was given a discount of shs. 2595. Calculate her percentage discount. (1mark)

24. a) Mr. Mutyaba spent $\frac{2}{3}$ of his salary and saved the remaining money. If he saved Shs. 180,000/=, what was his salary? (3marks)

b) The cost of a cock, a duck and a turkey are in the ratio of 3:4:5 respectively. The cost of a turkey is shs. 50,000 more than the cost of a cock. Calculate the total cost of a duck and a turkey. (3marks)

26. a) Solve and find the solution set for the inequality: $12 > 3p - 3$ where p is a natural number (3marks)

b) Subtract $b-2$ from $4b$ (2marks)

27. The figure below is of a banana garden, use it to answer the questions that follow.

a) Find the area of the banana garden. (4marks)

25. Study the number line below and use it to answer the question that follow.

a) Write the integers represented by the arrow: (1mark)

- i) $r =$
- ii) $p =$
- iii) $q =$

b) write down the subtraction mathematical sentence for the above number. (2marks)

28. Tap P alone takes 4 minutes to fill a water tank. Tap Q alone takes 8 minutes to draw water from the same tank.

a) How long will it take to fill the same tank when both taps are left open at the same time? (3 marks)

b) If it took one minute to fill 120 litres, find the capacity of the tank. (2marks)

29. In an athletics competition which started at 10:00 am. Kimrotan, Kiprotic and Kipong took 30 minutes, 40 minutes and 60 minutes respectively to reach at their starting point for the first lap. If they continued running for other laps. At what time will they reach again their starting point at the same time? (4marks)

30. The table below shows the performance of pupils in a test. Use to answer the questions that follow.

Number of pupils	4	1	K	2
Marks scored	65	90	80	70

a) If the average mark was 73, find the value of K. (3marks)

b) How many pupils scored above the median mark? (2marks)

31. Using a pair of compasses, ruler and a very sharp pencil only, construct a rhombus PQRS where diagonal QS and PR are 6cm and 8 cm respectively. (5marks)

32. A motorist drove from Kampala to Jinja through Mukono. He started the journey at 11:30 a.m. and drove at a speed of 50km/hr for 1 hour. He rested at Mukono for 30 minutes and then continued to Jinja which is at a distance of 85km away from Mukono at a speed of 34km / hr.

a) Show the motorist journey on the graph below. (4marks)

b) At what time did the motorist reach Jinja? (1 mark)

END
